SKILLS

Audio Production	
AI/ML Pipelines	
Voice Systems	
Sound Design	
Mastering	
Spatial Audio	

LANGUAGES

English	
Bengali	

TOOLS

Adobe Audition
iZotope RX
Auphonic
Descript
Riverside
Audacity
Gemini 2.5 Pro
Gemini Live API
Gemma
Groq/Whisper
React/Express

PROFILE

Audio production professional with 8 years of experience and 10,000+ hours of critical listening. Built an end-to-end AI audio production platform from zero budget — multi-agent orchestration, semantic audio editing, forensic quality audit, 3D spatial mapping. Published output ranked as a top AI podcast on Apple Podcasts.

EXPERIENCE

Founder & Lead AI Audio Systems Architect

2022 - Present

iHack Audio

- Built end-to-end AI audio production platform — 8 modules, 5 orchestrated agents
- Designed kinetic notation system for vocal performance engineering
- Created 5-pass semantic audio editing engine with pre-execution QC
- Built 3D spatial audio mapping pipeline (A24/Dolby Atmos target)
- Published output ranked as top AI podcast — zero marketing spend

Top Rated Audio Editor & Podcast Producer

2017 - Present

Upwork

- 900+ production hours logged. Top Rated status maintained.
- Podcast production, audiobook narration QC, sound design, professional mastering
- Multi-character dialogue production for international clients

IHACK AUDIO PLATFORM (V3.0.0)

- Multi-Agent Swarm: 5 orchestrated agents, voice-native control via Gemini Live API
- Audio Studio Pro: Semantic editing — Whisper → word-level timestamps → VAD → Gemma → 5-pass validation
- QuadCore: 4 parallel chapter engines, up to 30 API keys distributed across pool
- Forensic Audit: Automated quality scoring — scripting, technical, vocal, marketability
- Maya LoRA Voice Lab: Acoustic fingerprinting — F0, RMS, 13 MFCCs, cosine similarity

BUILT ON ZERO

Total infrastructure budget: \$0. Every system built on free tier — Google AI Studio, Groq, OpenRouter, Kaggle free GPU. Rate limits, quota caps, connection drops — all solved in architecture. Output still scored Tier 1 Broadcast standard.

PUBLISHED WORK

- iHack Audio Podcast — Ranked as top AI podcast on Apple Podcasts
- Multi-character AI narration, cinematic sound design, broadcast-standard mastering
- Production time: 4-6 minutes per episode, publication-ready
